Informed Consent Form

I, the undersigned, (full name.) _____

I am the next of kin _____

(the degree of relationship, patient's full name)

I give voluntary consent to provide autopsy material for the research "Study of human hepatobiliary system tissues in chronic opisthorchiasis caused by the liver fluke *Opisthorchis felineus*, to detail the mechanisms of fibrosis, activation of angiogenesis and immune response."

Research physician

I have received full explanations from the researcher regarding the nature, objectives and duration of this study.

I confirm that I have fully read and understood the attached information. I was provided with complete and understandable information. I had the opportunity to ask all the questions I was interested in.

I understand that participation is voluntary and I can withdraw my voluntary consent at any time and without giving a reason.

I understand that authorized representatives of the controlling organization and the ethics committee may review some of the medical records. By my signature, I grant them the right to access my relative's medical records.

I am also aware that all research will be coded and encrypted and presented as anonymized data at the time of scientific publication. My personal data and that of my relative will never be disclosed to anyone.

I will not attempt to limit the possible use of the results of the study. I also give permission to use autopsy material from the hepatobiliary system, pancreas and urinary system for various histological analyses.

Date, signature
